FOR IMMEDIATE RELEASE

Weather Guard and RMS Supply Join the EuroGutterUSA Team

Ornametals Manufacturing (“OM”) announces today that Weather Guard Building Products and RMS Supply are distributors of its EuroGutterUSA line of rainwater products. Weather Guard, located in Denver, Colorado, and RMS Supply, located in San Jose, California, each provide an excellent opportunity for Ornametals to serve a wide customer base located in the western U.S.

“We are very excited to join Ornametals during this critical time in our industry. By offering a U.S.-manufactured product to our customers, we support our economy and participate in its recovery. This alone is a great investment. At the same time, we can offer our customers the highest quality European-standard half-round gutter and seamless weld downspout at the same or better prices than before. It’s a win-win situation for all of us,” says Kevin FitzGerald, General Manager, Weather Guard Building Products.

Ornametals began manufacturing its EuroGutterUSA line of rainwater products in 2008. Its 27,000 manufacturing facility is located in Cullman, Alabama. Ornametals recently introduced EuroGutterUSA at the International Roofing Expo in Las Vegas with a video of its production facility. The video can be viewed in full at DesignandBuildWithMetal.com and at www.eurogutterusa.com.

“EuroGutterUSA represents a great opportunity for RMS. There’s no better time to offer a green, quality product to the building industry, especially when it’s manufactured in the U.S. Ornametals has offered us their full support, and we are confident in the EuroGutterUSA rainwater system,” says Katy Laubach, representative of RMS Supply.

Manufactured in the U.S. at Ornametals state-of-the-art facility, EuroGutterUSA is a complete line of European-quality half-round gutter, seamless weld downspouts, and accessories in copper and zinc. “We are very proud to be a U.S. manufacturer, says Guenther Huber, President of Ornametals. “And our entire staff stands ready to support our partners.”

Ornametals is actively seeking members of the EuroGutterUSA Team, a group of distributors and other partners who understand the value of investing in a U.S.-manufactured product that represents the highest quality and value. As members of the EuroGutterUSA Team, Weather Guard and RMS will enjoy unparalleled marketing and technical support from Ornametals.

“Ornametals welcomes Weather Guard and RMS Supply as the newest members of the EuroGutterUSA Team,” says Amir Massihzadeh, OM. “We are building a team of partners who will receive the highest quality rainwater system in the world along with outstanding service. We are committed to providing our customers top quality products at competitive prices made right here in USA. As a result we not only help our economy but also the environment.”

About Ornametals

Ornametals is a U.S. manufacturer of EuroGutterUSA, a complete line of rainwater goods in copper and zinc. Offering a full-line of gutters, downspouts, and accessories, Ornametals is a “one-stop-shop” for roof drainage supplies. With its recent installation of two top-of-the-line rollforming lines in its 27,000 square foot manufacturing facility located in Cullman, Alabama, Ornametals is the only U.S. manufacturer of a complete system of European-style rainwater goods. To complement the EuroGutterUSA line, Ornametals also offers custom-made radius gutter and custom and in-stock roof ornaments, leaderheads, finials, chimney caps, flashing and more. About Weather Guard Building Products

For almost forty years, Weather Guard Building Products, a Gibraltar Industries Company based in Denver, Colorado has been manufacturing and distributing top quality metal rain carrying systems and roofing systems. By focusing on quality and service, Weather Guard has developed a solid reputation for excellent products and superior customer service.

Weather Guard Building Products currently has six distribution locations in: Denver, Colorado; Salt Lake City, Utah; Omaha, Nebraska; Seattle, Washington; Fontana, California; and Honolulu, Hawaii.

From its headquarters in Denver, Weather Guard produces metal rain carrying and metal roofing systems appropriate for almost any residential, commercial or industrial application. Weather Guard manufactures aluminum, galvanized steel, Zinalume[®], copper and Rheinzink[®] as substrates in as many as thirty standard colors, which easily coordinate with the siding and trim on almost any home or commercial building. Weather Guard also offers several brands of rollforming machines, soffit, fascia, flashings and a full complement of related tools. Visit Weather Guard’s website at www.wgbp.com to download their full-line catalog.

About RMS Supply

RMS Supply is a metal products supplier located in San Jose, California geared toward servicing all the metal needs of the roofing and general contractor. We are excited to add the EuroGutterUSA product line to further enhance our full line of rainwear and exterior sheetmetal products. We are excited to partner with Ornametals in providing a high quality product to our customers while providing excellent customer service.
